SUMMARY

Senior product designer with 6+ years owning end-to-end product and web experiences, from user research and problem definition through interaction design to final UI. I design and maintain scalable design systems, drive conversion-focused experiences across desktop and mobile, and use AI tools daily to move from research to shipped work fast. Strong on both UX and UI, comfortable with product metrics and web analytics, and used to working independently in ambiguous, fast-moving environments. Accessibility (ADA / WCAG 2.2 AA) is baked into how I work, not bolted on.

CORE SKILLS

Product Design: End-to-end product design, UX research, user interviews, usability testing, interaction design, UI & visual design, information architecture, user flows, wireframing, high-fidelity prototyping, responsive design (desktop & mobile), conversion rate optimization, landing page & homepage design.

Systems & Accessibility: Design systems, component libraries, design tokens, visual hierarchy, typography, color, iconography, accessibility (ADA / WCAG 2.2 AA), design-to-engineering handoff, front-end constraints (HTML/CSS, basic React).

Practice & Tools: AI-assisted design workflows, data-informed design decisions, behavioural analytics (Microsoft Clarity, Piwik PRO), usability testing (Maze), jobs-to-be-done analysis, sales enablement & internal tooling, cross-functional collaboration, stakeholder communication, team leadership. Figma, Adobe Creative Suite.

EXPERIENCE

ViewSonic — Global UX/UI Team Lead
Taipei, Taiwan | Feb 2020 - Present

- Own end-to-end design of global product, web, and campaign experiences, from user research and problem definition through interaction design to final UI, across desktop and mobile.
- Founded and led ViewSonic's global design system from inception: secured stakeholder and cross-functional buy-in, defined roles and responsibilities, built the initial system, and owned the corporate UI. Embed accessibility into contrast tokens and component states, maintaining ongoing WCAG 2.2 AA alignment with the UI team.
- Drove accessibility remediation ahead of the European Accessibility Act (in force June 2025), raising automated accessibility scores (Lighthouse, via PageSpeed Insights) from ~75-80 to 98 on key pages, and secured US-team buy-in to apply the same standards to the ADA-relevant US site.
- Design and maintain global websites and marketing landing pages using scalable, reusable, component-based methods.
- Plan and run user research and usability testing (including comparative prototype tests in Maze) across B2B and B2C audiences, turning findings into clear design direction; a navigation-direction test cut task-completion time ~20% with a strong majority preference, setting the final IA.
- Use Microsoft Clarity and Piwik PRO across ~80% of projects (heatmaps, scroll depth, click maps), plus regular reporting across key pages and verticals, to locate friction and drive design decisions with data.
- Repositioned a featured-product stripe based on jobs-to-be-done analysis, serving mid-funnel consideration without sacrificing top-funnel exploration; click-through to product pages rose from 3% to 13% on key category pages (QoQ and YoY).
- Use AI tools daily to accelerate prototyping, research synthesis, and data analysis, cutting prototyping cycles from weeks to days and data-analysis turnaround by ~50%.
- Designed and shipped AI-assisted sales enablement tools, including an AI sales assistant for product discovery and tender analysis, and an AR tool for in-context product visualization and custom sales-sheet generation.
- Introduced scalable UX workflows that reduced website delivery timelines by 40%+ and contributed to initiatives that grew marketing-qualified leads by 800%+.
- Manage and mentor a two-person UX/UI team; partner with product, engineering, sales, marketing, and regional stakeholders, working within technical constraints and communicating design rationale to technical and non-technical audiences.

Kulchur Collective — Founder & Creative Director
Taipei, Taiwan | Dec 2018 - Present

- Run a design consultancy delivering UX/UI, digital product, and brand work for startups, small businesses, and independent creators.
- Own product and web experiences end-to-end, from research and IA through UI and handoff, working independently against ambiguous briefs and tight timelines.
- Ship websites and digital experiences, aligning UX decisions with client business goals and customer needs across touchpoints.

Independent Design & UX Consulting — UX/UI, Web & Digital Experience Consultant
Taipei / Remote | Jun 2013 - Dec 2018

- Delivered UX/UI, web design, content strategy, and creative direction for businesses and independent clients across multiple sectors.
- Applied human-centred design and systems thinking to clarify communication, improve customer touchpoints, and ship cohesive digital experiences.

EARLIER EXPERIENCE

Peacestreet Community Centre - Co-Founder & Creative Director, Taipei (2014-2019). BABI Group - Graphic Designer / Web & Content, Taipei (2016-2017). Loco Radio - Co-Founder, Marketing & Events, Dunedin NZ (2014-2016).

EDUCATION & CERTIFICATIONS

University of Otago - BAppSci, Design for Innovation & Environmental Management - Dunedin, New Zealand (2009-2014)

Certifications & professional development

Google Analytics Certification - Google

AI for Design Systems: How to Stay Ahead and Lead - Interaction Design Foundation (2025)
Product Psychology Masterclass - Product Psychology (2026)
Design for the 21st Century with Don Norman - Interaction Design Foundation (2025)
